Abstract Guidelines – IBD Nordic Conference 2019

The IBD Nordic Conference invites you to submit abstracts reporting new research or developing information on IBD. We welcome abstracts presenting unpublished studies, case reports, systematic reviews and scientific approaches on methodology and quality improvement. Studies presented in part on other meetings and recently published data can also be considered. The Scientific Program Committee will select abstracts on the basis of their medical significance, the quality of the data and methodology, and adherence to specific format requirements and other criteria described herein. The selected abstracts will be offered presentations as posters a few of these will also be selected for oral presentation.

Instructions for posters

Posters will be created online, using the iPosterSession system for multi-media interactive posters (www.ipostersessions.com). They will be displayed on large format HD touch screens at the conference. The iPosters will be available for exploration during the entire conference, and presenters are encouraged to be at their screens during the full poster session time (coffee breaks, see program).

IBD Nordic 2018 Poster Award

The best poster will be selected by the Scientific Program Committee and rewarded with a Research Grant of 2.500 Euro; the "IBD Nordic 2018 Poster Award".

Abstract Timetable

Abstract submission opens	2019-02-01
Last day for submitting abstracts	2019-10-25
Decisions of abstracts emailed	2019-11-10

Abstract Length

The titles of abstracts should not exceed 15 words. The body text should not exceed 350 words. Embedded images (tables, figures, etc) will be counted as 30 words.

Required Elements

Each abstract must include the following:

Title. The title should appear in boldface at the top. It should be concise (no more than 130 characters, not including spaces) and unambiguously represent the subject of the abstract.

Authors' names. These names should appear in below the title. They should be separated by commas, with first names first followed by middle initials and last name only (no titles or degrees). The presenting author should be the first name added in the authors list. Add affiliations, use superscripts to identify the author and the affiliation (for example: Name A[1], Name B[2], University X[1], University Y[2]).

Background: This section briefly presents the hypothesis of the abstract or encapsulates the subject under study.

Methods: This section details the experimental methods and processes employed in the study. Results: This section describes the precise findings of the study. Promises of results "to be determined" are not acceptable.

Conclusions: This section describes logically sound conclusions and reliable inferences from the results.

Submit your abstract at http://www.mediahuset.se/abstract/?section=ibd-nc-2019&l=en_US
